

FAIJAN ANWAR

Software Developer | Full Stack (MERN) Development

Jaipur, Rajasthan, India | +91 70147 02263 | faizan244244@gmail.com | faijan.in | linkedin.com/in/faijan-anwar | github.com/faijananwar

PROFESSIONAL SUMMARY

Software developer with a strong foundation in programming fundamentals, data structures, algorithms, database management, and operating systems, built through an MCA in Computer Science and 2+ years of hands-on full-stack development. Experienced across the complete software development life cycle — designing, building, testing, and deploying scalable web applications in JavaScript, TypeScript, Python, and Java. A quick learner with a track record of picking up new frameworks independently, comfortable in cross-functional teams, and eager to build deep expertise in enterprise platforms such as Salesforce and ServiceNow.

TECHNICAL SKILLS

Programming Languages: Java, C, C++, Python, JavaScript (ES6+), TypeScript

Core Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Software Development Life Cycle (SDLC)

Web Development: React.js, Next.js, Node.js, Express.js, REST APIs, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL, Supabase

Tools & Practices: Git, GitHub, Postman, Version Control, Code Review, Unit/API Testing, CI/CD (Vercel, Render), GCP

Additional: Basics of Solidity/Smart Contracts, JWT & AES-GCM based application security

EXPERIENCE

Full Stack Engineer — Orinson Technologies Private Limited (Remote)

May 2026 – Present

- Collaborate with a cross-functional virtual team across the full development life cycle — requirement understanding, design, implementation, and testing.
- Structure clean, modular frontend and backend components, improving overall codebase maintainability.
- Participate in sprint-based development cycles and coordinate with team members to meet delivery timelines.

Web Developer — Global IT Providers, Jaipur

May 2026 – Present

- Contribute to end-to-end web development projects, following clean architecture and coding best practices under senior developer review.
- Build modular components and support database integration, debugging, and performance optimization.
- Take part in code reviews, incorporating feedback to continuously improve code quality.

Freelance Full Stack Developer — Independent Contracts

2024 – Present

- Delivered 20+ production-grade web applications for global clients, managing design, development, testing, and deployment independently.
- Documented technical designs and processes, and maintained a 100% client satisfaction rate through consistent, quality-focused delivery.

PROJECTS

DevBlog Platform | React, TypeScript, Node.js, Express.js, PostgreSQL

- Developed a full-stack blogging platform with role-based authentication and a modular, testable REST API architecture.
- Implemented schema validation and relational data modeling, then deployed to production with a live demo.

SecureVault — Encrypted Notes Platform | React, Node.js, Express, MongoDB, JWT

- Built a secure notes application with authentication, encrypted storage, and a per-user file upload pipeline.
- Deployed frontend and backend separately in a production configuration, handling integration and debugging end-to-end.

DAO Governance System | React, TypeScript, Solidity

- Designed a governance platform with proposal creation and voting logic, pairing a responsive React interface with backend contract logic — demonstrating quick adoption of an unfamiliar technology stack (Solidity/Web3) from the ground up.

EDUCATION

Master of Computer Applications (MCA), Computer Science — Poornima University, Jaipur

2025 – 2027

- Relevant coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Software Engineering.

Bachelor's Degree — Maharaja Surajmal Brij University (MSBU)

2022 – 2025

CERTIFICATIONS

- API Security on Google Cloud's Apigee API Platform — Google Cloud
- Google Cloud Computing Foundations: Cloud Computing Fundamentals — Google Cloud
- Red Hat System Administration I (RH124) — Red Hat
